

# RADIAL TYRES FOR TRACTORS

**Firestone**

OUR TRACTION. YOUR PERFORMANCE.

## THE HIGH-PERFORMANCE TRACTOR TYRE THAT BOOSTS YOUR PRODUCTIVITY

We all know the statistics. The world's population is expected to grow to 9 billion by 2050, demanding an increase in food production of over 70%. Never before has the pressure to increase productivity and yields been so great.

Which is why Firestone is helping farmers get even more out of their land with tyres that deliver greater productivity, enable more efficient, cost-effective operations and minimise the impact on your precious top-soil.

Superior traction means you can cover a greater surface area in less time and with lower fuel consumption. While low soil compaction helps you improve crop growth, boost and yields, reduce tyre wear and increase efficiency and competitiveness.

Get ready for the future with Firestone's full range of premium tractor tyres.

### FIELD CARE

With the world's population continuing to grow and available arable land scarcer than ever, increasing productivity and **preserving the environment has never been more important.**

At Firestone, we understand the constraints of fostering both productive and profitable agriculture. Which is why we develop tyres that help you **work faster** and **more efficiently**, while **protecting your most precious asset: a healthy soil.**

The **Field Care logo** symbolises the importance of the environment and the technology we develop in order to protect it. To help farmers help the world today and tomorrow.

## The tyres that offer a securer future

Firestone's premium range of tractor tyres delivers the performance you need to get the maximum from your land. Work faster, go further and produce more thanks to Firestone's most advanced tread, compound and construction engineering yet. By enabling greater traction and higher loads at reduced tyre pressure, Firestone's latest tractor tyres help you boost your efficiency and productivity while protecting your valuable crops and top soil.

## OUR TECHNOLOGIES

### Advanced "IF" technology

Improved Flexion (IF) tyres are designed to either carry the same load at lower inflation pressure or carry a higher load at the same pressure. They feature a casing with side-walls that enable a greater degree of flexing, increasing substantially their footprint, resulting in lower soil compaction, increased yields and enhanced productivity.

1. Carry the same load at lower pressure

2. Carry extra load at the same pressure

### Dual angle lug design

For greater traction up to 4% compared to standard agricultural tyres in a wide range of conditions.

# OUR TRACTION. YOUR PERFORMANCE.

## YOUR BENEFITS

### **Guaranteed soil protection**

The Firestone MaxiTraction IF's robust casing and sidewall improves flexion, allowing for higher load capacities at lower inflation pressure. That means a larger contact patch and thus higher traction with less soil compaction. To protect your most valuable asset for generations to come.

### **Incredible traction**

This allows you to get the job done and cover a greater surface area in less time using less fuel.

### **Proven durability**

The optimised casing, larger footprint and larger contact patch of Firestone tractor tyres result in more gradual and more even tyre wear. Cut-resistant compounds increase tyre life even further.

### **Efficient performance**

While improved traction helps save time and fuel in the field, Firestone tractor tyres' high speed index lets you drive faster on the road for greater efficiency and productivity.

A RANGE OF TYRES DESIGNED FOR GROWING RESULTS

## MAXI TRACTION IF

For top performance: reduced soil-compaction and more working efficiency.

- Up to 20% heavier loads.
- Excellent driving comfort, even at high speed (70 km/h).
- Long tyre life and uniform tread wear.

28	IF 600/65 R28	160D 157E
	IF 600/70 R28	164D 160E
30	IF 600/65 R30	161D 158E
	IF 600/70 R30	165D 161E

	IF 710/70 R42	179D 176E

## MAXI TRACTION

For high horsepower tractors.

- Upgraded load- and speed indexes (D/E).
- Great traction, self-cleaning and driving comfort.
- Long tyre life and uniform wear.

## **NEW** MAXI TRACTION 65

Maximum traction and maximum life for medium and large horsepower tractors.

- Longer tyre life, thanks to new lug design.
- Excellent traction, thanks to patented Dual Angle Lug Design.
- Increased driver comfort, thanks to its longer and overlapping lug\*.

## R4000

Vineyard and orchard service for medium to low horsepower tractors.

- Excellent lateral stability, steering accuracy and cut-resistance.
- High load capacity.
- Low soil-compaction and rutting.

16	7.50 R16	102A8 99B
	280/70 R16	112A8 109B

	360/70 R20	129A8 126B

## R8000 SEVERE SERVICE

For agricultural tractors operating on hard, dry, rocky terrain.

- Cut and puncture resistant.
- Good traction.
